Policy for Water Conservation

Objectives of the policy

To abide by the measures of water conservation for ensuring the optimum use.

To provide pure drinking water facilities to all.

To recycle and recharge and use water for other purposes.

Statement of Policy

Save water save life is the slogan of our day and we believe in the same and practice the following measures for the conservation of water:

1. To be conscious about the importance of the water resources and its conservation.
2. To close the water taps properly after the use.
3. Close the taps and pipes on seeing that it is not properly done.
4. To follow the instructions given at the drinking water areas.
5. Not to use any pollutants, colours or chemicals at the water bodies and taps.
6. To inform the concerned authority on finding any leakages of taps and pipes.
7. Create social awareness for the conservation of water.
8. To conduct programmes related to water conservation in PD and related Committee activities.
9. The institute uses the rain water harvesting methods and water recharging systems for proper use of the water resources.
